About the author

Hi I'm Suzi,

Cooking, creating and juggling a busy schedule seem to come natural to me. When my daughters were young, I owned a busy cake shop that produced as many as 20 wedding cakes per weekend and hundreds of all occasion cakes per month. Serving delicious and nutritious meals to my family was important to me. To avoid the fast food habit (not saying we never ate fast food) I came up with some ways to prepare some things ahead to make getting dinner on the table less of a chore.

I found myself sharing my tips and tricks with other busy moms and vowed that *someday* I would find a way to share them on a larger scale.

This is why I started my blog www.ClassIsIn.com Here you will find plenty of recipes and ideas to *streamline* and add a bit of *class* to your life.

I hope you'll stop by sometime and when you do please leave a comment. I'm looking forward to hearing from you soon!

Why...

I'm always looking for a quicker and easier way to do things that have the same or better results. Somewhere along the way I hit upon this trick for ground beef. It has saved me time and money over and over.

I find that the quality of meat at the large discount stores like Costco and Sam's club is often superior to that in the regular grocery stores. Buying in bulk is also very economical but some people find it is not always practical. Here is my practical and economical trick for buying bulk ground beef. Try it once ... I promise you will never go back.

Enjoy!

How...

Start with...

1 large (5-6 lb.) package of lean ground beef

Heat 2 large skillets on high heat, divide ground beef among the 2 skillets. Cook until thoroughly cooked and slightly browned, crumbling with wooden spoon while cooking. I don't season the meat as it will get seasoned in the recipe. Drain beef in a colander (this helps remove the fat)

Divide cooked ground beef among 4-6 quart size Ziploc freezer bags. You want bags to have about 1-1 1/2 lbs. each. Experiment with what works best for your family. Write date or use by date on bags. Place bags in freezer. I find it is best when used within 2-3 months though it rarely lasts that long at my house :).

Important Tip!!! - Always take bags from freezer then straight to the microwave for thawing. For some reason if left in the refrigerator it takes on a different not so good taste.

I always keep these bags of cooked ground beef in my freezer. I try to replace before I use the last bag that way I am always prepared to make a quick and easy meal in a pinch.
